#### Power. Amendment.

For regulation 15, 16 and 16A of the said regulations, the following regulations shall be substituted, namely:—

"15. (1) The Registrar of Local Fund Income Taxes, shall audit the annual accounts—  
(a) of every registered trade taxon which has not less than 200 members on any day in the financial year preceding the year in which the audit takes place, and

(b) of every collection of taxon in which not less than 5 lakhs were collected at any time during the financial year preceding that in which the audit takes place.

Provided that in the case of a registered trade taxon or a collection of taxon, which has been newly formed, the clause shall apply at any one day during the financial year in which the audit takes place where 300 members in the trade taxon or 5 or more lakhs were collected in the financial year.

(2) Every registered trade taxon and every collection of taxon referred to in clause (1) shall submit the annual statement required under section 25 of the Act in Form "E" within the auditor's designation, as in so much the Registrar as or before the 31st day of April in each year.

(3) The Registrar shall on receipt of such return arrange to get the accounts audited by the Registrar of Local Fund Income Taxes, Madras, in accordance with clause (a) and take such other action as is required hereunder.

(4) Application for audit from registered trade taxon and collection of taxon referred to in clause (1) shall reach the Registrar not later than the 1st day of April, following the financial year in which the audit takes place.

(5) Subject to any general or special orders that may from time to time be issued by the Local Government the Registrar of Trade Taxes shall in consultation with the Registrar of Local Fund Income Taxes, Madras, arrange for the annual audit of the accounts of the registered trade taxon and collection of taxon referred to in clause (1). The cost of such audit shall be borne by the Local Government. The audit shall be conducted by the Registrar of Local Fund Income Taxes, Madras, in accordance with the instructions which the Registrar of Trade Taxes may from time to time issue. A copy of the report of such audit shall be sent by the Registrar to the Trade Taxes control and a copy shall also be sent to the Registrar's office. A copy of the report shall be forwarded by the Registrar to any person on application and on payment of adequate fee at the rates fixed by the Registrar in this behalf.

16. (1) Every registered trade taxon not being a registered trade taxon or a collection of taxon referred to in clause (1) of Regulation 15 shall submit the annual statement required under section 25 of the Act in Form "E" duly audited as in so much the Registrar as or before the 31st day of July in each year.

(2) The annual audit of accounts of every such trade taxon shall be conducted—

(a) by an auditor authorized to audit the accounts of companies under sub-section (1) of section 244 of the Indian Companies Act, 1912 (VII of 1912); or

(b) by a person who having held an appointment under the Government in any audit of accounts of department is or is exempted of a sanctioned position of not less than Rs. 75 per mensem; or

(c) by a provincial co-operative organization recognized by the Local Government for the purpose; or

(d) by any two members of the union who are not either office bearers or members of the executive committee on any day during the financial year in which the audit takes place.

2. At the meeting held on the 16th February 1930, the Indian Legislative Assembly resolved that the proceeds of the additional duty (2 annas per gallon) on petrol should be allotted as a block grant for expenditure on road development to be credited to a separate road development account, the corresponding balances of which should not have

at the end of the financial year, and that the annual grant should be distributed among the Governor's Provinces. Assignments from the Central Road Development Account are subject to the following conditions:—

- (a) The assignment is to be made to each province in the ratio which the consumption of petrol in that province bears to the total consumption in India in the preceding calendar year;
- (b) the assignment should be credited to Provincial Revenue, the expenditure therefrom being subject to the vote of the Provincial Legislative Council;
- (c) works to be financed from the assignment will have to be approved by the Government of India on the advice of the Standing Committee for Roads and its Finance Sub-Committee;
- (d) the unspent balance of the assignment made in a particular year will be carried forward to the subsequent year for expenditure.

3. The statement attached (Annexure II) shows receipts and payments on account of allocations from the Central Road Development Fund up to 31st March 1933. The budget estimates for 1933-37 anticipated receipts of Rs. 14.08 lakhs and expenditure of Rs. 30.62 lakhs. The total amount of grant available for expenditure up to the end of 1933-37 may be taken as about Rs. 43.72 lakhs. The Government of India have, however, proposed to introduce a revised system of payment of the grant according to which further grants will be disbursed quarterly in advance of requirements after the allocations already placed at the disposal of the Local Government are exhausted. The amount actually allotted as grant in the current year will therefore be a small sum and the expenditure is also expected to be less than that anticipated in the budget owing to delay in the receipt of the Government of India's sanction to a number of new works proposed by the Government. The total commitments as far as account of works in progress and new works sanctioned are as indicated below:—

	Grant made.	Expenditure 1933-37
(a) Sanctioned works in progress	50.44,983	
(b) New works recently sanctioned by the Govt. of India	25.13,000	20 lakhs.
Total	45,72,310	

4. The Road-Rail Conference held in April 1933 recommended that a comprehensive plan should be drawn up with a view to encouraging the possibility of development of both main and subsidiary roads from loan funds within the limit of the resources available for maintenance. In pursuance of this recommendation, the Government appointed Mr. Vign as Special Engineer, Road Development, to draw up a comprehensive programme of road development (including improved methods of road making) and construction of bridges and causeways. Mr. Vign accordingly drew up a scheme of road development for the Presidency which has already been published. According to this scheme, the requirements of this Presidency are estimated at Rs. 6.32 crores; in view of the limited resources available, the Government proposed to undertake works costing from Rs. 3 to 3½ crores from loan funds, the repayment of which was to be made from the receipts from the Road Development subventions and from tolls to be levied on traffic passing over bridges to be newly constructed.

5. As the Government of India are not now inclined to permit subventions from the Central Road Development Fund to be utilized for the purpose of financing a road development loan, this Government propose to proceed with the more urgent and important schemes and to finance them partly from the ordinary subventions received annually from the Government of India, viz., Rs. 15 lakhs, and partly by loans to be raised in such manner as may be found practicable on the security of provincial revenues. It is proposed for the present that the loan expenditure should be confined to amounts which could eventually be recovered by the levy of tolls on traffic passing over the bridges after they are constructed. The Special Engineer is accordingly drawing up a programme of works for Rs. 12.61 lakhs to be spread over seven years. The proposals in this programme are announced in Annexure II. While, as shown in paragraph 2 above, expenditure in the recent past has not kept pace with receipts, the adoption of a definite seven years' scheme should make it possible to reduce the unspent balance and to spend the annual assignment more promptly. Commitments up to the amount of present available have already been incurred.

6. The Road-Rail Conference held at Simla in April 1933 recommended that reliable machinery should be established at the centre and in the Provinces to ensure adequate co-ordination between all forms of transport and their future development. Accordingly

in Madras the old Road Board was abolished and a new Board of Commissioners consisting of representatives of all interests affected was formed. Five meetings of the Board have been held in 1935 and 1936. The Board have approved 202 proposals for expenditure from the Road Development Fund. Of these, the Government of India have approved 115 and refused sanction for two. Their sanction is awaited in respect of the remaining proposals.

7. Action has already been taken on the following recommendations made in Mr. Vipin's report:—

(1) Mr. Vipin has pointed out that, in view of the limited funds available, especially after the abolition of tolls, the district boards have not been able to devote adequate attention to the proper maintenance of roads other than trunk roads, although many of them carry very heavy traffic and are of considerable importance from the point of view of marketing produce and serve as feeders to the railway systems. For this reason, he held that a definite lack of balance exists at present in the road system of the Presidency and that to correct this, a reclassification of the roads should be made. He has accordingly suggested that all the important roads (including the present trunk roads) should be included in a new class to be called 'trunk and important marketing roads' and has recommended revised rates of grants to be given from Provincial funds for their maintenance, all other roads being maintained by the district boards entirely from their own funds. As the Government are not at present in a position to undertake any large reversing commitments in the shape of additional grants for maintenance, they have decided that it must suffice for the present to reverse existing arrangements as follows:—

*Trunk roads.*—There will be no change in the existing classification of these roads or in the amount of grants for their maintenance.

*Important marketing roads.*—These will form a separate class and will consist of important roads selected by the Government on the recommendation of the Special Engineer for Road Development. Grants will be given from Provincial funds for the maintenance of these roads to the extent of the expenditure incurred by district boards, subject to the maximum fixed. The Government grant previously given for "second class" roads must in future be spent only on the roads classed as important marketing roads.

(2) With reference to Chapter X of Mr. Vipin's report, a scheme for converting an experimental road surfacing on the Great Northern Trunk Road leading out of Madras has been sanctioned by the Government of India to the extent of Rs. 3 lakhs. One half of the cost is to be met from the account with the Government of India in the Road Development Account and the other half from the Government's share of the Road Development Account. A scheme for providing cement concrete roadway from miles 5/5 to 7/3 and for tar painting from miles 7/3 to 15/6 of the Great Western Trunk Road has also been approved by the Board of Commissioners and the Government of India have been advised to sanction the debit of the cost of this scheme to the Road Development Fund.

(3) *Road rollers.*—Mr. Vipin's recommendations on this matter in Chapter IV of his report have been sanctioned by the present Special Engineer (Road Development) with reference to further information obtained from the district boards and their requirements have been tabulated. The question of finding ways and means for the purchase of rollers is engaging the attention of the Government.

8. *Skeleton system of trunk roads.*—The Government of India have included the following roads in the skeleton system of trunk roads, so far as this Presidency is concerned:—

- (1) Great Northern Trunk Road (between Madras and Calcutta) from Porumbottamper via Virajpettam to Madras.
- (2) Beavada-Hyderabad Road, from Beavada to Madras boundary.
- (3) Madras-Bangalore Trunk Road from Madras via Chittoor and Palacoor to Madras boundary.
- (4) Madras-Calicut Road from Wollapet via Krishnagiri, and Sakin to Calicut and thence north to join the Bangalore-Bangalore Road at Haralur.
- (5) Great Southern Trunk Road from Sakin via Madras to Nagercoil.
- (6) Bangalore-Bombay-Hyderabad Road from Madras boundary to Kanneel via Anantapur and Gooty.

(7) *Rayer-Vieira* road from Vieira via Sales to Madras boundary. Expenditure from the Road Development Fund on works on these roads will not be objected to on the ground that such works may lead to increased competition between road and rail traffic.

**B. Special Engineer for Road Development.**—The post of Special Engineer for Road Development was first created for a period of one year from 24th August 1933 and has since been extended up to 30th September 1937. It is now held (with effect from 30th June 1936) by Mr. A. Nageswara Ayyar, the Senior First Grade District Road Engineer. His main duties at present are to work out proposals to implement Mr. Vign's scheme so far as funds permit, to watch the progress of works relating to the Road Development Fund and to advise the Local Self-Government Department where necessary on matters relating to local road works.

be well undertaken to do the whole work subject to the satisfaction of contract. This estimate accompanying the tender form shall be received together and the form, estimates, specifications, or statement of quantities. Conditions, where necessary, should be made by one sheet and containing, drawing and covering.

20. Tender offering a percentage deduction from or increase on the estimate is allowed, and these are submitted in proper form, or in any form will be rejected. Notes or stamp may accompany for notes not added. It shall not be included in the tender. No alteration which is made by the tenderer to the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognized, and if any such alterations are made, the tender will be void.

21. The tenderer shall work out his own rates, make no reference being made to the Public Works Department reference schedule of rates or to the Public Works Department estimate rates which are not open for inspection by contractors.

22. The price of materials and labour from which various particular materials shall be obtained by contractor are given at the end of the estimate accompanying the tender form. Tenderer shall quote their price for material, such as generally, but not for imported charges will be lower by Government in connection with the supply.

23. The quantity of the materials is checked to the nearest requirements as in the case of beginning work, the rate of progress and the date for the completion of the whole work, with the six and parts. The following rate of progress and approximate rates of work done from time to time will be adopted by the Executive Engineer's estimate of the value of work done, will be required. Date of acceptance of the programme will be the date on which the work is probably to be done over to the contractor.

Period of time of completion.	Percentage of work completed (based on total work) (see note 23)
Three months . . . . .	40 per cent.
Six months . . . . .	60 . . . . .
Nine months . . . . .	80 . . . . .
Twelve months . . . . .	100 . . . . .

24. No part of the contract will be subject without written permission of the Executive Engineer and shall tender be made by price of estimate submitted return to receive payment on the contract is held.

25. If further summary information is required, the Executive Engineer of the division will furnish such as it may be further submitted that having made be submitted in order and according to contract form.

26. The Executive Engineer of other authorities authority reserves the right in respect any tender or all the business without requiring any reason therefor.

27. The qualification of the person or persons employed by the contractor in the execution of the work will be given due consideration in awarding the contract. The tenderer should therefore state in clear terms whether they employ such labour and staff, and if so, give the qualifications of staff and state the extent to which they will be employed on the work.

28. No payment will be separately made for taking water from the ground, and during construction having to be at the site and division of water required during construction. The rates quoted by the tenderer must include the above-mentioned charges.

29. The lowest bid is to be taken as the basis of the contract, and the tenderer will be required to be considered to the date fixed for completion of the work.
